**Instructions for collection of Bone Marrow sample for cytogenetic studies:**

1. The media vials for collection of sample, can be obtained from the Cytogenetic Laboratory at Sir Gangaram Hospital
2. Please flush the syringe with heparin before collection of the sample. Collection should be done using sterile technique
3. 0.5ml to 1 ml of the first sample of bone marrow collected should be added in each vial provided. This will avoid blood contamination.
4. Please provide clinical details of the patient, with report of peripheral blood and bone marrow. The sample should be sent immediately after collection to the Cytogenetic laboratory, Sir Gangaram Hospital.
