First Quarterly Meet of Delhi Orthopaedic Association 2017

Dear All,

Spine surgery is now a recognized separate field with its own subspecialties, but since it draws people from both neurosurgery and Orthopedics, its important that the general orthopedic surgeons remain updated on the latest developments in this field and continue doing basic spine procedures and management as it would be a while before pure spine surgery Departments take shape in a large country like us.

Keeping this in view the Orthopedic Spine surgery department of Sir Ganga Ram Hospital is pleased to organize the first Quarterly meet of Delhi Orthopedic Association on 18th Feb 2017.

The one-day programme has been designed keeping in view large no of young Orthopaedics trainees and covers four basic modules

Prolapsed Lumbar Disc
Tuberculosis of Spine
Spinal trauma
Degenerative Spinal Disorders

We will also have a workshop of spine fixation techniques both Lumbar and cervical, where young surgeons can practice their skill under supervision of experts on Saw Bone models

Dr. R.S. Chahal
Organizing Secretary

Date : 18th February 2017 (Saturday)
Venue : Auditorium, Sir Ganga Ram Hospital, New Delhi

SCIENTIFIC PROGRAMME

Date : 18th February 2017 (Saturday)
Venue : Auditorium, Sir Ganga Ram Hospital, New Delhi

10.00 AM

Onwards: Registration

10-1.0 PM

WORKSHOP ON SPINE FIXATION TECHNIQUES

Faculty

Dr. Abhisek Srivastava - Primus Hospital
